Clay pigeon shooting at JA Shooting Club.

ON THE DAY

More about the course

This intensive one-day immediate implant course covers immediate implant placement in the aesthetics zone, premolars, molars and in conjunction with sinus work. Delegates will look at different types of delayed loading and the techniques to achieve successful results. They will observe live demonstrations and practicals on animals' heads to enhance their skills.

Delegates will get the opportunity to use the latest generation of Alloplastic products with an integrated membrane to achieve predictable results. By the end of this course, participants will have a comprehensive understanding of immediate implant placement and loading techniques, enhanced practical skills, and knowledge of advanced materials, leading to improved patient outcomes and practice efficiency.

ABOUT THE SPEAKER

Dr Andrew Fish

Andrew graduated from the University of Glasgow in 2006. He went on to do a two-year speciality training programme at the Edinburgh Dental Institute, which involved rotations between different dental specialities and during this time he passed his MFDS examination and became a member of the Royal College of Surgeons.

After GPT he worked as a member of the West of Scotland Oral and Maxillofacial team for two years. He continued within the speciality for a further three years in the Northwest of England. He was appointed a Specialist Dentist in Oral Surgery and Restorative dentistry at Manchester Dental Hospital in 2012.

He has been involved with dental implants since his GPT years and in addition to his hospital-based hands-on training. Andrew is an elected member of the British Association of Oral Surgeons and the Association of Dental Implantology. He is active in postgraduate education both in teaching and learning and draws upon many years of hospital-based experience.
